Deadlock

- Four necessary & sufficient conditions for deadlock:
 - tasks require to use a non-shareable resource
 - tasks hold onto resources while waiting for extra ones to be assigned to them
 - resources cannot be taken away from tasks by an outside agency
 - there is a circular chain of tasks requesting a resource held by another task

pero

Being involved in everything makes it easy to see what's right and wrong. The wrong is jarring and unsettling, and our instinct is to fix it.

Be realistic about what you can change and influence – and how long it will take.

INNOVATION

The Case for Stealth Innovation

by Paddy Miller and Thomas Wedell-Wedellsborg

FROM THE MARCH 2013 ISSUE

You have an idea for a daring, innovative project that could have a significant impact on your business. However, you suspect that your idea will meet with internal resistance: The innovation would upset the status quo, and chances are good that other parts of the organization will try to stop it. What's your next step?

The conventional answer is simple: Get a mandate from the top. As many innovation experts rightly point out, only the most incremental ideas pass through the corporate approvals gantlet unscathed. The more unusual your idea, the greater the risk that it will fall victim to turf wars, myopic incentive systems, or simple resistance to change. For this reason, innovators are often counseled to go straight to the top, secure
